ANNUAL WINTER WHEAT AND RYE

SEED LIST

11

Prepared by

Minnesota Crop Improvement Association

1924

A. D. Haedecke, Secretary

University Farm

St. Paul, Minn.

The following is a list of growers of pure bred varieties of Winter Wheat and Rye, also the probable amount of seed each will have for sale.

The Crop has been inspected in the fields and passed. The seed will qualify as certified seed if it is handled according to the instructions given by the inspector. This list is sent out before the final bin inspection so that those wanting seed can get in touch with the growers and have seed reserved.

After this grain has been threshed, cleaned, and is ready for sale, a second inspection will be made. If the seed then comes up to the requirements for certified seed, the grower is given a certificate and provided with shipping tags showing that the seed has been certified. The tag is the grower's guarantee to the buyer. The next year's crop, grown from this seed, can then be certified. A rye field must be at least 20 rods from other rye fields to be certified.

The price is left to the grower who should have a price that will be enough over the market price to well repay him for his extra work in producing certified seed. There is a big demand for this seed both within the State and from other States. Those intending to seed winter rye or wheat this fall are therefore urged to put in their orders now. We should like to see every bushel placed in Minnesota.

WINTER RYE

TO GROWERS HAVING SEED LISTED

If you want to build up a reputation for having good, dependable seed that a buyer will keep in mind for next year and also tell his neighbors about, please consider the following carefully.

1. Give every inquiry *prompt* attention. Acknowledge an order at once. If your supply is gone and you know where he can obtain the seed, refer him to this party. Keep a supply of postal cards on hand so you can notify your party promptly.

2. *Notify the Secretary when your supply of seed is gone.*

3. Send out only *good clean seed*.

4. See that the germination and purity tests are marked on the tag. This is required by law.

5. Notify the buyer when the seed is shipped by sending the Bill of Lading.

6. *Make sure of payment before shipping.*
